

# **BABA IS YOU**

## **USER MANUAL**

**Launch :**

To launch the game, simply execute babalsYou.jar with this command :

```
java -jar babalsYou.jar
```

**Gameplay :**

The program will launch every level in GameMaps folder beginning at the first level.

To move use you arrow keys.

To use cheatcodes, press the « C » key on our keyboard then return to terminal and write your cheatcodes, then press enter.

**Cheatcodes :**

```
--levels « folder name »
```

Load all levels in a folder. When you finish one, the next level in the folder will be loaded.

```
--level « level.txt »
```

Load a level file.

```
--execute « word1 word2 word3 »
```

Execute a sentence like BABA IS WATER. It doesn't matter if you use uppercases or lowercases.
